SADDLEBACK™

This field-ready design is composed of 316L high-grade Stainless Steel, harnessed in a band of genuine leather. The adaptable wrist mount can be worn as a stand-alone strap or looped through a leather sheath. For convenient viewing in low light environments, the easy-to-read display includes luminous phosphors. Accuracy is maintained by the precision of quartz calibration and Swiss made five-jewel movement, powered by the endurance of a 74-month battery. The dial face is shielded by the hardest crystal used in watchmaking, pure sapphire, optimized with anti-reflective coating.

OAKLEY THUMP™

DIGITAL MUSIC EYEWEAR

THUMP™ DIGITAL MUSIC EYEWEAR

A music revolution. No strings attached. Lightweight O Matter® frame material offers all-day comfort. OAKLEY THUMP is built with a 256MB or 512MB flash memory, so there are no moving parts that can make a song skip. XYZ Optics® maintains critical clarity at all angles of vision, even at the periphery of raked-back lens contours that maximize protection against sun, wind and side impact. Flip-up lenses are made of pure Plutonite®, a material that blocks 100% of all UVA, UVB, UVC and harmful blue light. Pivoting speaker creates a true fit. Mini extendible booms that swing away whenever you need to hear your environment. Speakers reach the full 20kHz limit of human hearing.
