SUN / OPTICS CATALOG 2014

At Oakley, we build for the brave — those who defy convention, derail the idea of what is impossible and disrupt the kind of thinking that makes the rest of the world ordinary. Our authenticity comes from world-class athletes who rely on our products because they demand the best and refuse to compromise. Our heritage was fueled by the drive to go beyond reason, and by serving those who do the same, we achieve innovations for all.

When the rest of the world doubts you, you're probably on the right path, and it's a path of defiance that can change the world. You are the inspiration of Oakley. Because we build for the brave.

SUN FRAME TECHNOLOGY

FRAME MATERIALS

Engineering breakthroughs in structural materials allow Oakley to produce lightweight, high-performance frames that maintain superior protection and comfort.

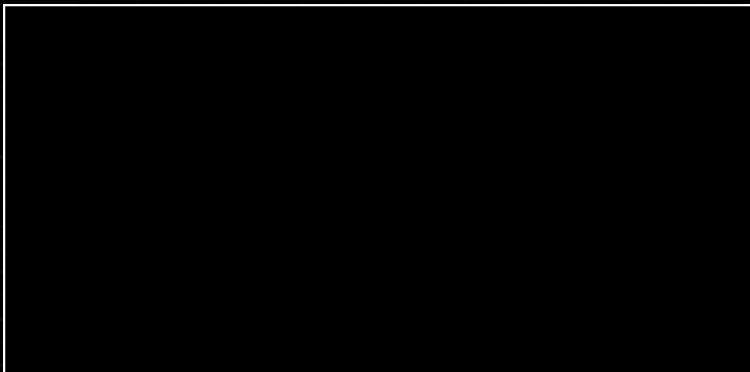

O MATTER®

Formulated for high durability and controlled flexibility, Oakley's lightweight O Matter® frames maintain superior protection, comfort and performance.

C-5™

To produce the ultra-strong, ultra-lightweight chassis of Oakley wire frames, five metallic compounds are fused into a single C-5™ alloy.

ACETATE

Hand-made layered acetate allows for a multitude of rich hues and colors, as well as visual textures, giving this frame material its high quality look and feel.

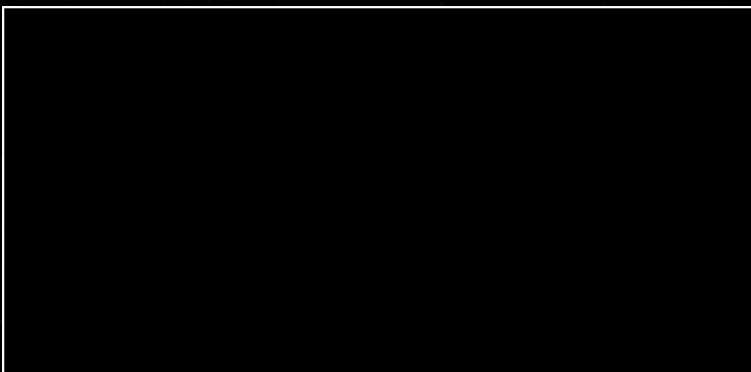

TITANIUM

An ultra-lightweight, virtually indestructible material used in fighter jets, titanium allows us to produce some of the strongest, lightest and most comfortable Oakley wire frames.

CARBON FIBER

With durability that comes from decades of research and development in sports innovation, this ultra-lightweight material provides superior comfort and flexibility.

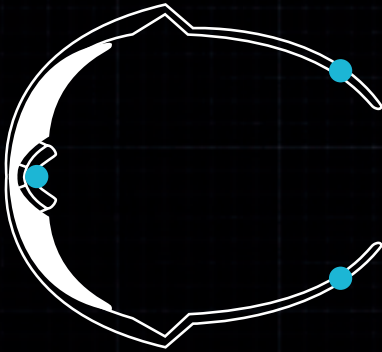

ALUMINUM

The high strength-to-weight ratio of Oakley's aerospace-grade aluminum alloy enables the bold styling of sculptural designs in a durable and very lightweight frame construction.

SUN FRAME TECHNOLOGY

THREE-POINT FIT

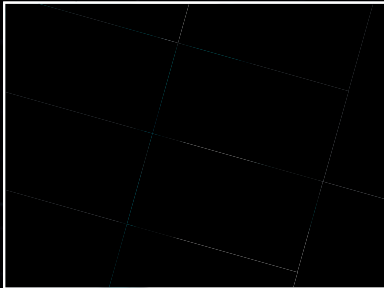

Oakley's patented Three-Point Fit ensures that each frame makes contact only at the bridge of the nose and behind the temples. This retains optics in perfect alignment, maintains a secure fit and eliminates the discomfort of ordinary frames that hook the ears with unbalanced pressure points.

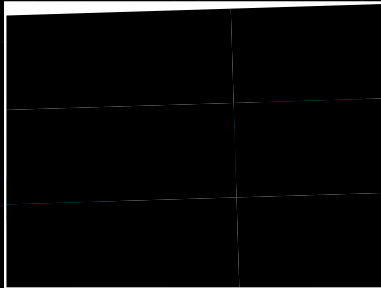

UNOBTAINIUM®

First introduced on our sport performance products, Unobtanium® earsocks and nosepads provide increased comfort and performance. Increases grip with sweat.

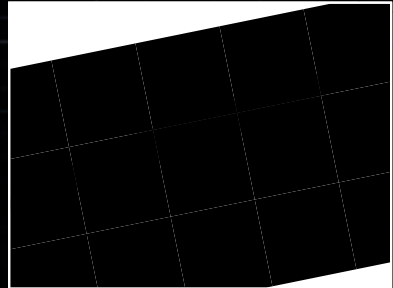

NOSEPADS

EARPADS

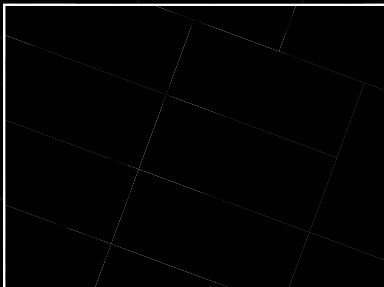

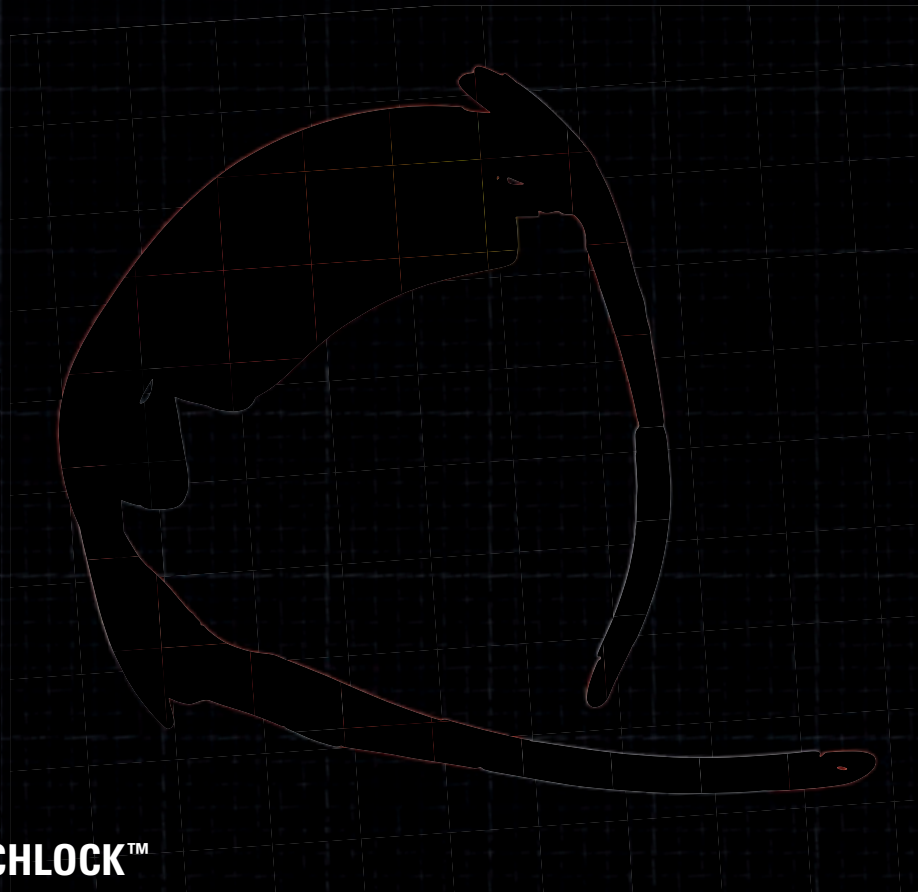

EARSOCKS

SNAGLESS NOSEPADS

Oakley Women's patented, hassle-free, adjustable nosepads won't snag or pull your hair.

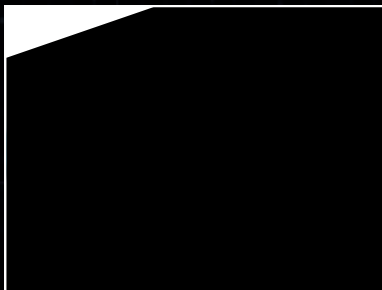

SWITCHLOCK™

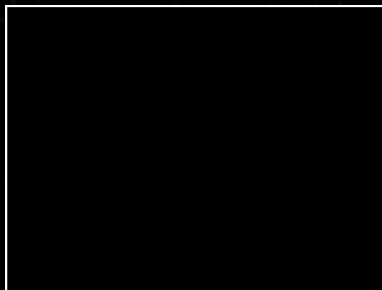

More secure and less complicated. That describes Oakley Switchlock™ Technology, an invention that allows for fast, easy and hassle-free lens changing. First introduced with Jawbone sunglasses in 2007, it is now available in our latest evolution of frame technology, Oakley Radarlock™. With Switchlock Technology, your customers can quickly switch to the lens tint that provides the best combination of filtering, color balance and visual contrast.

- + Provides optimal convenience with innovations that make lens changing quick and hassle-free.
- + Offers the ability to adapt to any environment and keep up with changing light and weather conditions.

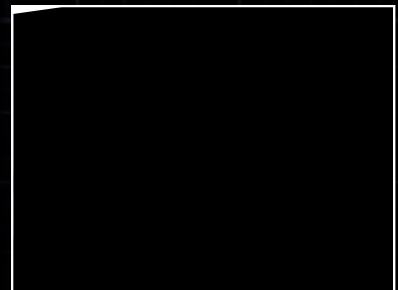

RACING JACKET®

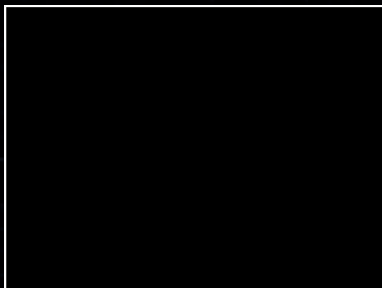

FAST JACKET®

RADARLOCK™

STYLE SWITCH™

SUN LENS TECHNOLOGY

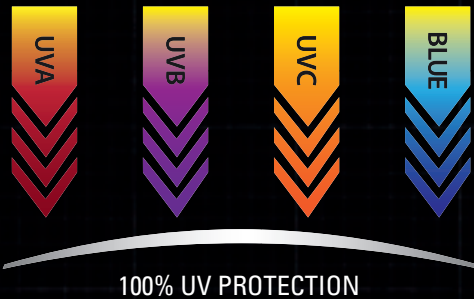

HIGH DEFINITION OPTICS® (HDO)

A combination of technologies and patented innovations that give you clearer, sharper and more accurate vision, HDO® virtually eliminates the distortion common in high-wrapped sunglasses.

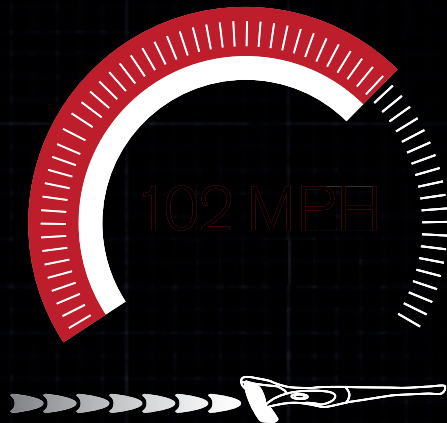

- + REFRACTIVE POWER. Conventional lenses can magnify images. HDO® precision gives you more accurate vision across the entire field of view.
- + ASTIGMATISM. Ordinary lenses can't focus all light waves in the part of your eye that does the seeing. With HDO®, you won't have the blur of inferior optics.
- + PRISMATIC POWER. With regular lenses, objects aren't really where you see them. HDO® offers a truer visual image, and it helps ensure each eye has the same image so your brain won't have to work overtime.

UV PROTECTION

- + Oakley Plutonite® filters out 100% of all UVA, UVB, UVC and harmful blue light up to 400nm.
- + The lens material itself blocks UV, so you don't have to rely on a thin surface coating that can wear away or become scratched.
- + Our optical technologies allow for lens curvature that improves protection at the top and sides of your eyes.

IMPACT PROTECTION

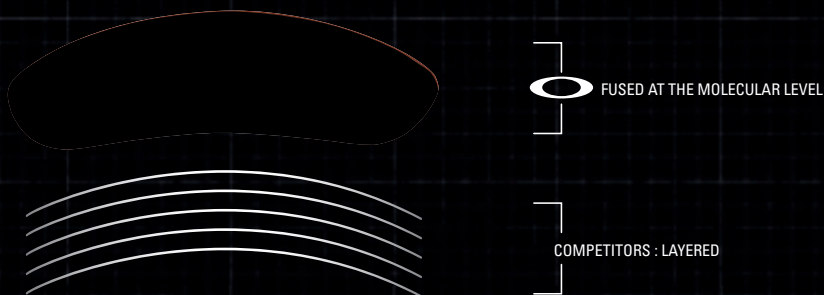

Visual impact isn't just about looks. So our performance sunglasses meet and exceed the impact-resistance standards of the American National Standards Institute.

- + For high-velocity impact testing, a quarter-inch steel shot is blasted from a pneumatic cannon at 102 mph / 164 kmh.
- + The high-mass impact test uses a metal spike (more than a pound of weight/half a kilo) dropped from over four feet.

OAKLEY HDPOLARIZED™

- + We fuse the polarizing filter at the molecular level. Our competition uses a cheaper “sandwich” method that can result in haze and optical illusion.
- + Oakley HDPolarized™ lenses block 99% of reflected glare while offering the proven clarity and performance of High Definition Optics®, ensuring enhanced visual contrast and improved depth perception.

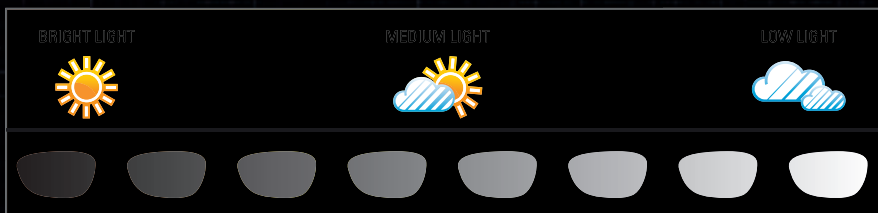

FILTERS 99.9% OF GLARE

PHOTOCHROMIC

- + Our photochromic lenses help you adapt to changing light conditions so you can always perform at your best.
- + Your lenses won't be too dark when the sun pulls a disappearing act or too light when it knifes through the clouds.

LIGHT CONDITIONS

LENS ADAPTATION

AUTHENTIC PRESCRIPTION LENSES

Oakley can custom-build eyewear with prescription lenses exactly to the doctor's orders. Take advantage of the quality and innovation of a specialty lab created for Oakley dealers. It's the only way to maintain the integrity and warranty of the Oakley sunglass and frame. Numerous lens options are available, including Oakley HDPolarized and progressive lens technologies, and all lenses feature the unbeatable clarity of Oakley True Digital Technology.

SUN LENS TECHNOLOGY

ROAD

GRASS

TRAIL

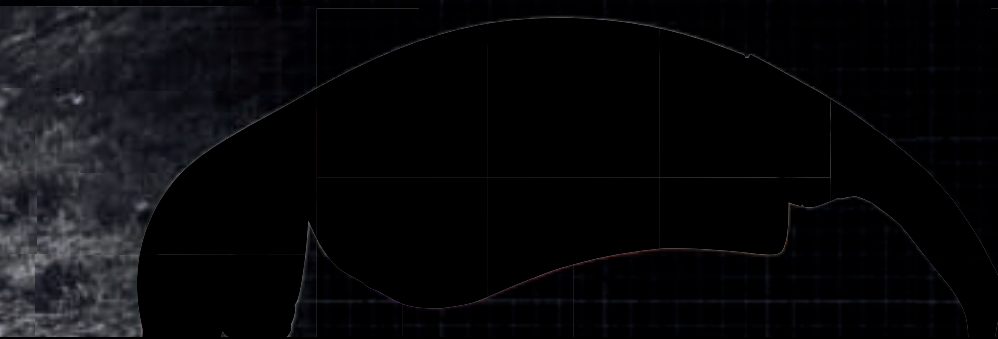

WATER

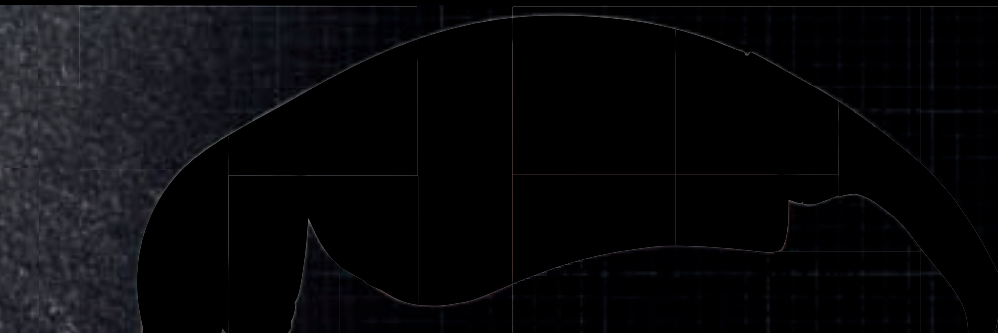

EVERYDAY

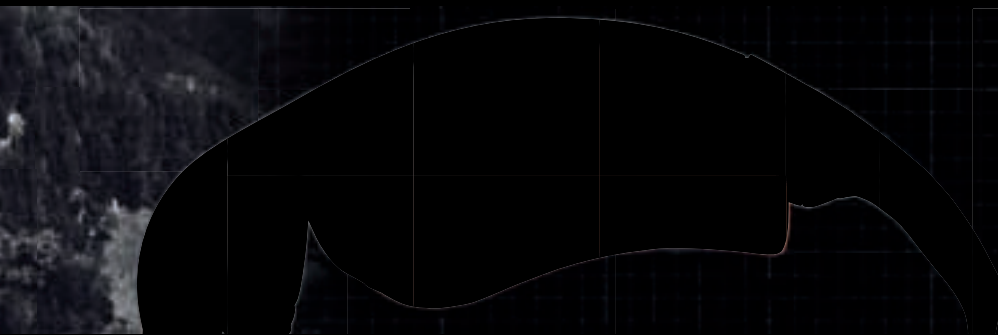

00® RED IRIIDIUM® POLARIZED

Harsh rays of light won't distract you with the 00® Red Iridium® Polarized lens; engineered to protect your eyes from the blinding glare of paths and pavement.

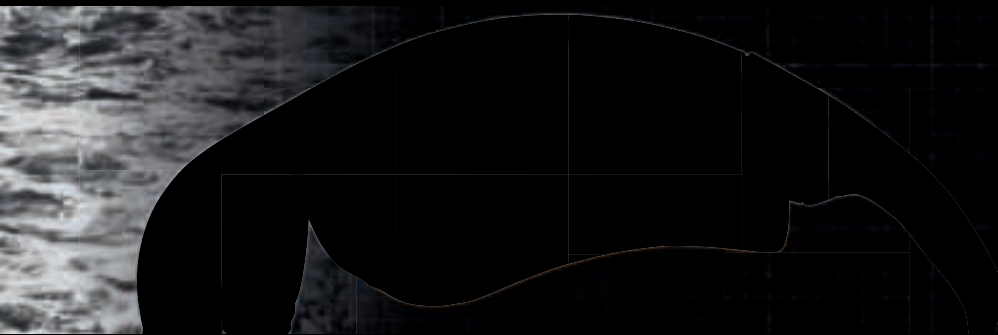

G30™ IRIIDIUM®

Essential equipment for world-class golfers, G30™ Iridium® optimizes visual detail and depth perception to help you spot subtle variations in grass textures and slope contours.

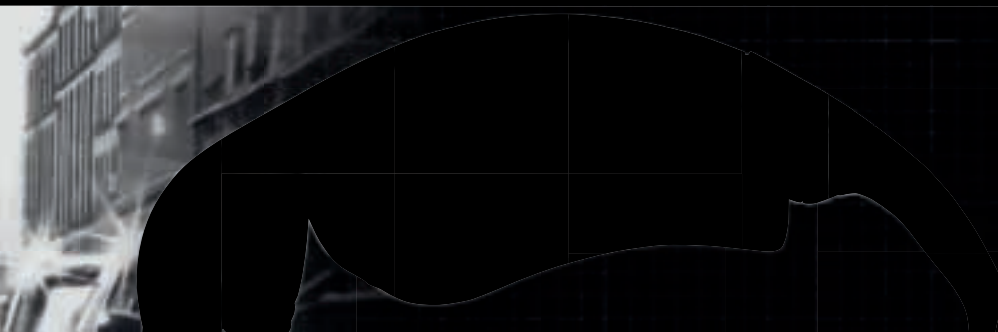

VR28® BLACK IRIIDIUM®

In medium to low light, our specially engineered VR28® Black Iridium® lens maximizes clarity and depth perception by increasing contrast between the subtle shades of brown, green and red in trail environments.

BRONZE POLARIZED

70% of the world's surface is covered by water, and 100% of it is ready to blind you with glare that can be up to ten times brighter than surrounding light. All of our water lenses block 99% of reflected glare to eliminate all that irritation, discomfort and distraction.

BLACK IRIIDIUM® POLARIZED

Excellent all-purpose lens for bright light conditions. This lens covers a full range of sports and training — practically anything under the sun, especially when it is bright and blinding.

Oakley's High Definition Optics® (HDO®) offers the ultimate in performance. Now get the ultimate in automatic protection, comfort and convenience: lenses that darken and lighten automatically to help you keep up with Mother Nature. They're called Transitions adaptive sunwear and they combine Transitions Photochromic technology with Oakley HDO® to give you the best clarity available, plus the unrivaled impact protection and 100% UV filtering of one of the purest lens materials on earth.

They feature base colors that precisely balance light and boost contrast to improve your depth perception. When sunlight is minimal, the color diminishes but never goes away, so you can maintain peak performance in the flat light of overcast skies. As sunlight increases, the sunglass lens color darkens to keep up.

Add it all up and it's proof that there's only one thing better than sunglass lenses that change color: sunglass lenses that change color and give you the best visual quality, clarity and performance.

OAKLEY 070

JULIAN WILSON

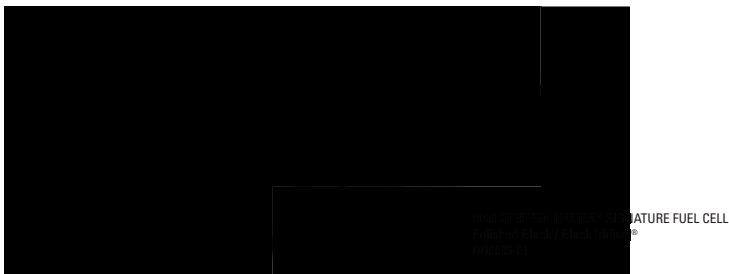

A proud member of the Oakley pro surfing family, Julian Wilson first grabbed the world's attention by earning national junior titles by his mid-teens. In 2006, Julian won the ISA World Junior Title and became the youngest surfer ever to win Surfer's Best Performance of the Year award. He's been an unstoppable force since then, recovering from a broken foot to earn two finals in 2010 and become the Triple Crown Rookie Of The Year. Oakley is honoring his power and passion for surfing with a special edition that will be unleashed with unlimited distribution.

BRUCE IRONS

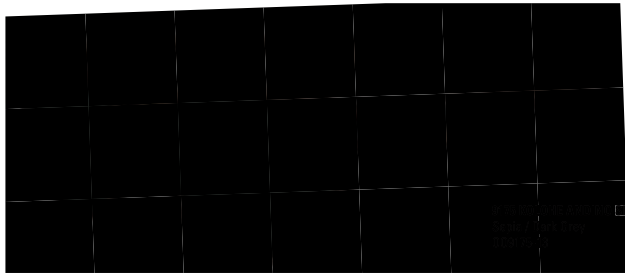

Arguably one of the best surfers in the world, Bruce Irons is renowned for his tube riding skills and massive aerials. He's an icon in the world of surfing, and his approach to life is like his approach to waves, aggressively original with no apologies. It's Bruce's style that inspires his Signature Series editions - clean and uncomplicated style with an edge of attitude.

STEPHEN MURRAY

British BMX rider Stephen Murray won the gold medal in BMX Dirt in the Summer 2001 X Games and won gold medals in BMX Dirt at the Gravity Games in back to back years (2001 and 2002), a feat unmatched to this day. However, in 2007, while performing a double back flip, he suffered a horrifying crash that left him paralyzed from the shoulders down. If you think this tragedy made him give up, you don't know Stephen. His second special edition piece, the Oakley Fuel Cell, is a work of aggressive styling worthy of a warrior who knows no white flag. UK lions flank the metal icon accents, and the graphics along the sides are styled from the inked emblem of courageous strength taken from Stephen's tattoo.

KOLOHE ANDINO

SIGNATURE GARAGE ROCK

Kolohe “Brother” Andino inspired this special edition. Earning a spot on the prestigious ASP World Tour isn’t the only achievement of the young ripper. His interest in photography has resulted in stunning pics, and we nabbed a Kolohe original for the print on the included Microclear™ bag that stows the shades. Garage Rock™ is a salute to the ‘60s with metal detailing inspired by electric guitars, and it speaks to Kolohe’s love for classic rock played with the pure sound of vinyl. He’s also into Japanese culture, so we engraved his name with Japanese writing near the edge of the lens.

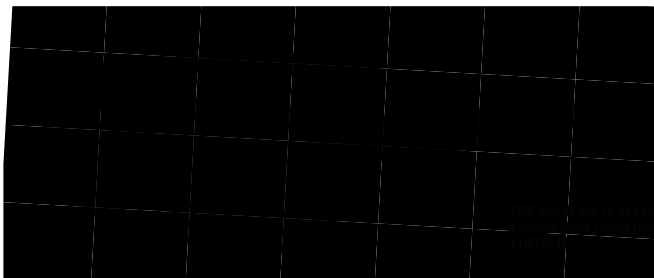

SÉBASTIEN LOEB

NATURE JUPITER SQUARED
® Polarized

Next time you see a movie with mind-blowing chase scenes, realize that Oakley's Sébastien Loeb can perform that level of pedal-to-the-metal wheel work with expertise and finesse that makes stunt drivers jealous. Oakley salutes the skills of the most successful competitor in World Rally Championship history with Sébastien's own Signature Series Jupiter Squared.™ So far, he and his co-driver have conquered an astounding nine championships. Sébastien's hobbies include surfing, MX and helicopter flying, and his picture probably appears in medical books under "adrenalin."

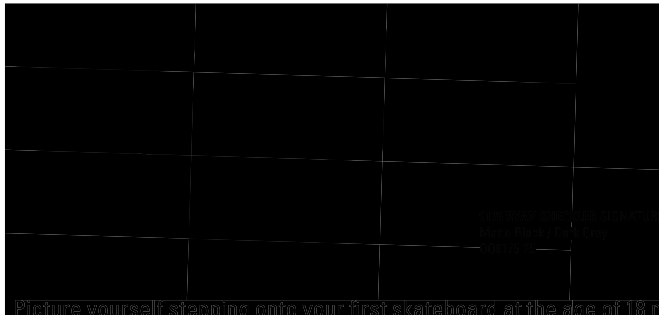

JORDY SMITH

ATURE JUPITER SQUARED
m® Polarized

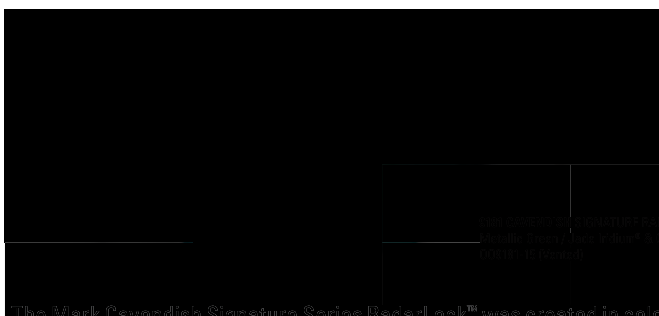

Oakley's Jordy Smith is leading the charge of South African surfers who continue to rewrite the rules of possibility, and his aerials are redefining the limits of new school surfing. Jordy won both the 2010 and 2011 Billabong J-Bay competitions in South Africa (part of the WT, World Tour). He's a surfing prodigy who is driven to push progression, and with full rotation aerial maneuvers and his brilliant use of rail surfing, they're calling him the next major force to dominate the sport. We're honoring his talent and original style with the Jordy Smith Signature Jupiter Squared™ sunglass. This prized rendition will have unlimited distribution worldwide.

RYAN SHECKLER

Picture yourself stepping onto your first skateboard at the age of 18 months. By the time you reach seven, you've got a mini-ramp in your backyard, and you earn your first X Games gold by 13. Today, you're living loud and inspiring a generation, and that's when you're not busy dropping a heavy hammer of tricks. That's the story of Oakley's Ryan Sheckler, and we're tossing him a big salute with his Signature Series design.

MARK CAVENDISH

The Mark Cavendish Signature Series Jade-Iridium™ was created in celebration of Cav's achievements and his relentless dedication to push the boundaries of cycling. The Cavendish Green of this special edition salutes the color that drives him to win the coveted green "points" jersey of the Tour de France. Engineered for bright sun, the Jade Iridium® lens improves visual contrast and depth perception.

OPTICAL FRAME TECHNOLOGY

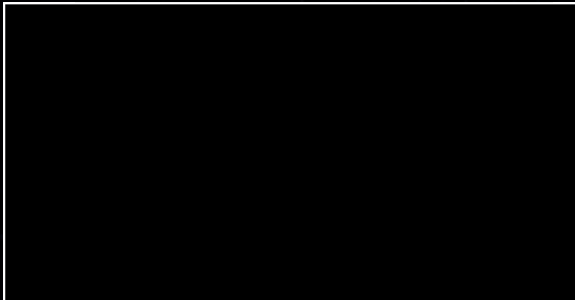

FRAME MATERIALS

Engineering breakthroughs in structural materials allow Oakley to produce lightweight, high-performance frames that maintain superior protection and comfort.

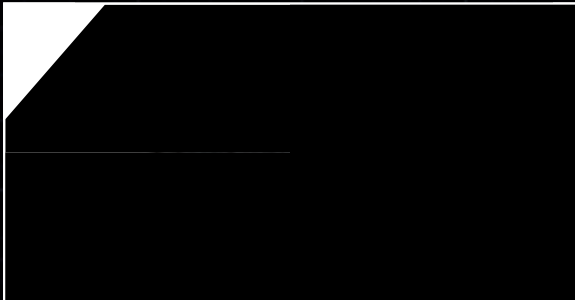

ACETATE

Handmade layered acetate allows for a multitude of rich hues and colors, as well as visual textures, giving this frame material its high-quality look and feel.

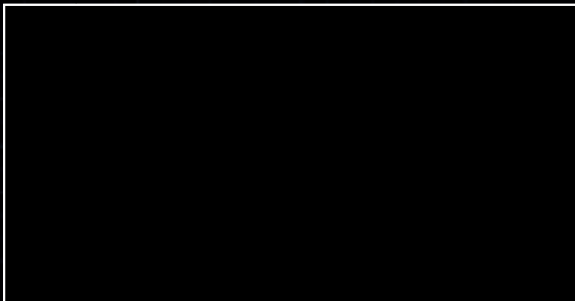

ALUMINUM

The high strength-to-weight ratio of Oakley's aerospace-grade aluminum alloy enables the bold styling of sculptural designs in a durable and very lightweight frame construction.

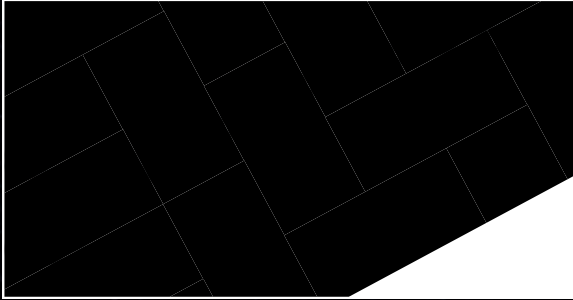

CARBON FIBER

With durability that comes from decades of research and development in sports innovation, this ultra-lightweight material provides superior comfort and flexibility.

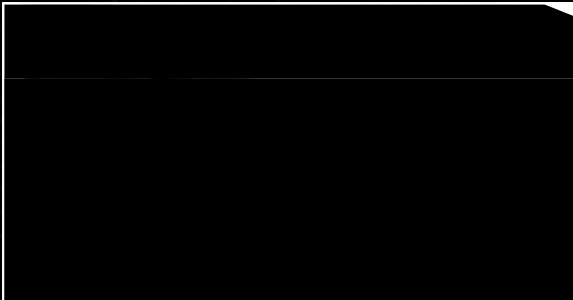

C-5™

To produce the ultra-strong, ultra-lightweight chassis of Oakley wire frames, five metallic compounds are fused into a single C-5™ alloy.

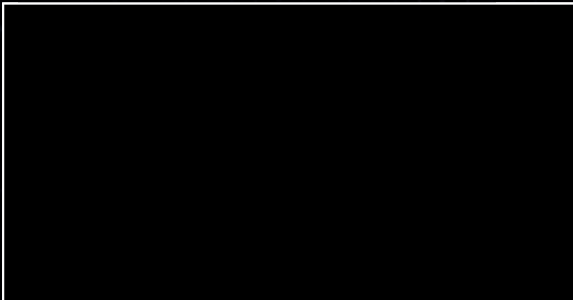

NANOWIRE™

Comprised of incredibly sleek and ultra-lightweight titanium alloy, Oakley Nanowire™ creates sculptural contours without sacrificing comfort or flexibility. Shape-shifting Memory Metal flexes and springs back into place, providing an adaptable fit that borders zero-gravity.

O MATTER®

Formulated for high durability and controlled flexibility, Oakley's lightweight O Matter® frames maintain superior protection, comfort and performance.

TITANIUM

An ultra-lightweight, virtually indestructible material used in fighter jets, titanium allows us to produce some of the strongest, lightest and most comfortable Oakley wire frames.

OPTICAL FRAME TECHNOLOGY

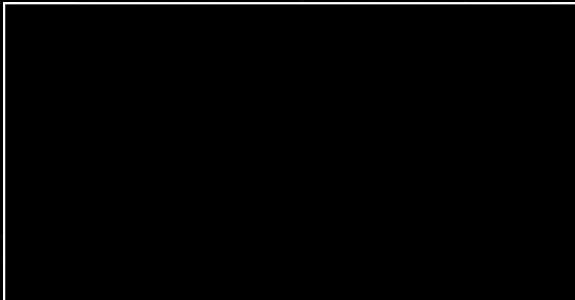

HINGES

Oakley hinge designs range from the miniaturized mechanics of dual-cam action to spring hinges that maintain a stable, pressure-free fit. Inspired by racing technology, these industry-leading hinge designs provide unrivaled durability and aesthetics that do not compromise comfort or fit.

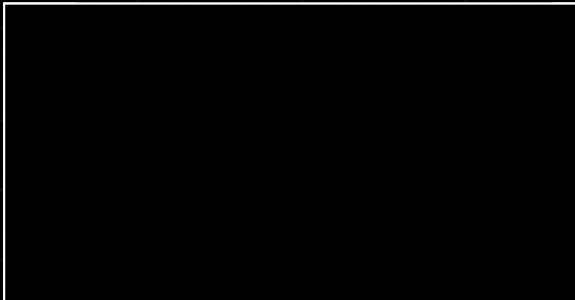

HOLLOWPOINT™

Inspired by hubless motorcycle wheels, HOLLOWPOINT™ hinges turn simplicity into a work of art. This pure approach uses a self-contained spring cam mechanism and an internal piston, achieving a minimalist design that is both sturdy and lightweight.

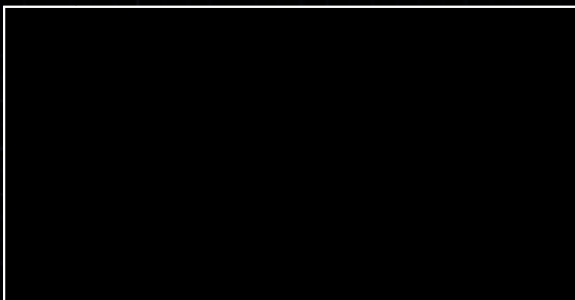

MONOSHOCK™

The Oakley MONOSHOCK™ hinge combines mechanical precision for flexibility, comfort and fit to create a prescription frame hinge that is as big on technology as it is on style. The MONOSHOCK™ hinge has a single "tine" (a slender projecting part, like the tine of a fork) that bridges the frame and earstem.

TWINSHOCK™

Inspired by pro racing, the structure of the Oakley TWINSHOCK™ hinge is similar to leaf springs used for shock absorption. Utilizing two tines, the TWINSHOCK™ hinge combines durability, flex, comfort, fit and distinctive design architecture that is unique to Oakley.

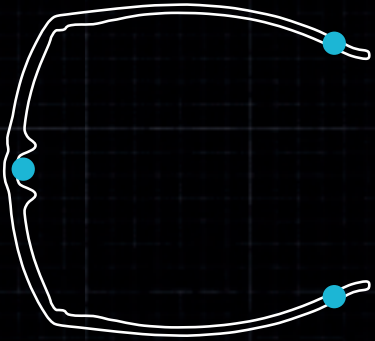

ZERO PROFILE™

To achieve an entirely new aesthetic, we created a seamless blend of mechanics and art that does away with the inconvenience of a bulky hinge. The integrated design of the ZERO PROFILE™ spring hinge leaves nothing but a sleek sculpture, and it maintains full durability and comfort.

THREE-POINT FIT

Oakley's patented Three-Point Fit ensures that each frame makes contact only at the bridge of the nose and behind the temples. This retains optics in perfect alignment, maintains a secure fit, and eliminates the discomfort of ordinary frames that hook the ears with unbalanced pressure points.

OPTICAL LENS TECHNOLOGY

OAKLEY TRUE DIGITAL™ (OTD)

Oakley True Digital™ lenses maximize performance by utilizing Oakley Dual-Peripheral Technology™ to deliver the best possible optics.

IN THE FAR PERIPHERY
BLURRING AND DISTORTION
ARE MINIMIZED, PROVIDING
BETTER MOTION DETECTION.

IN THE MID PERIPHERY
BINOCULAR VISION IS
BALANCED, PROVIDING
BETTER RECOGNITION OF
LARGER IMAGES.

DUAL PERIPHERAL TECHNOLOGY™

OAKLEY STEALTH™

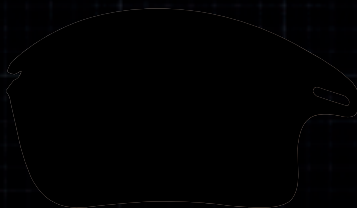

REAL LIFE SIMULATION

	1.00	2.00	3.00	4.00	5.00
OAKLEY STEALTH™	4.84				
Leading AR	4.75				
Standard AR	2.30				

Introducing Oakley Stealth™, the first AR coating engineered exclusively for the critical needs of athletes and sports enthusiasts.

- + Reduce back-surface reflection and optimize the wide, crisp visual field of Oakley True Digital™ lenses.
- + Repel dust, dirt and oils with an invisible shield of oleophobic and anti-static protection.
- + Depend on industry-leading durability, which is athlete-ranked and backed by a two-year warranty.

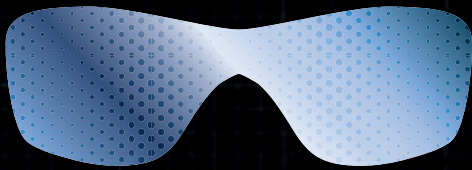

AUTHENTIC PRESCRIPTION LENSES

EVERY AUTHENTIC OAKLEY LENS IS MARKED WITH AN OAKLEY "O"

Oakley can custom-build eyewear with prescription lenses exactly to the doctor's orders. Take advantage of the quality and innovation of a specialty lab created for Oakley dealers. It's the only way to maintain the integrity and warranty of the Oakley frame.

IRIDIUM® LENS COATING

 FUSED AT THE MOLECULAR LEVEL

- + Oakley Iridium® lens coatings allow the wearer to tune transmission for any light condition.

UV PROTECTION

100% UV PROTECTION

- + Oakley Plutonite® filters out 100% of all UVA, UVB, UVC and harmful blue light up to 400nm.
- + The lens material itself blocks UV, so you don't have to rely on a thin surface coating that can wear away or become scratched.
- + Our optical technologies allow for lens curvature that improves protection at the top and sides of your eyes.

**OPTICAL LENS
TECHNOLOGY**

OAKLEY PRESCRIPTION SUN LENSES

ROAD

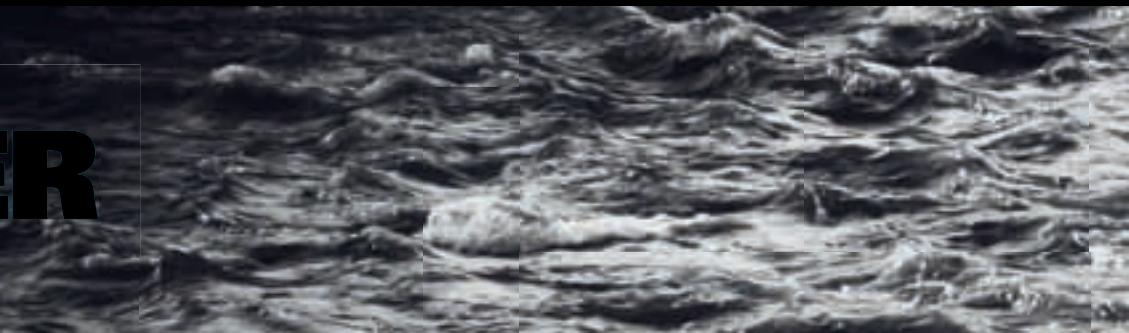

GRASS

TRAIL

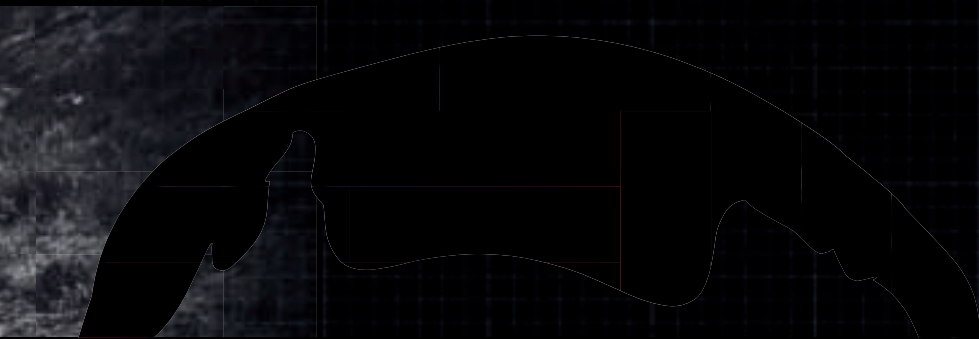

WATER

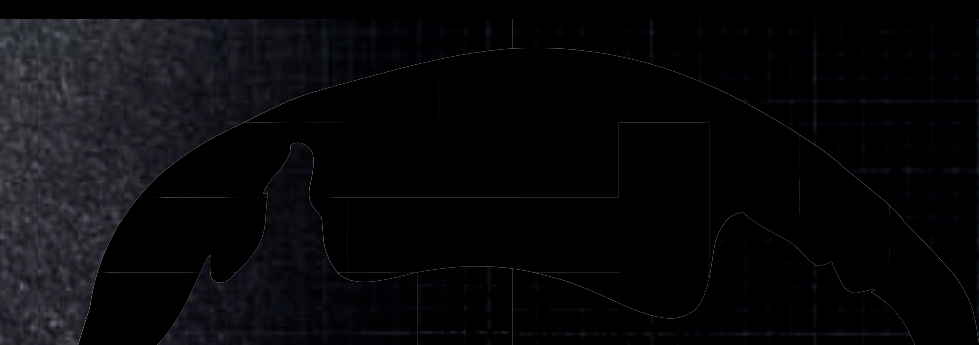

EVERYDAY

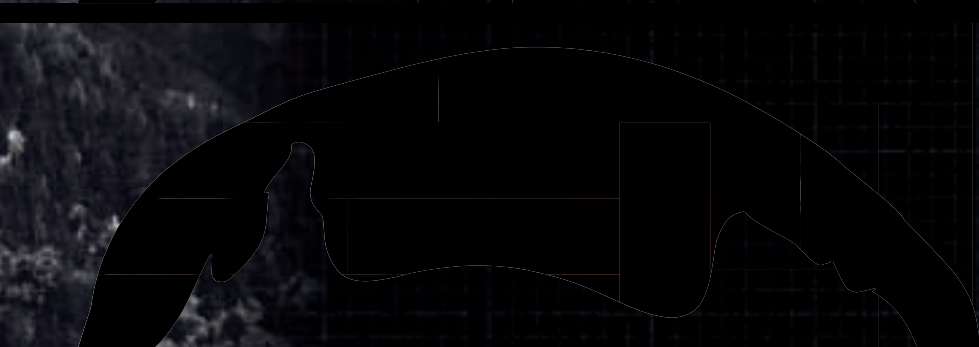

00® RED IRIDIUM® POLARIZED

Harsh rays of light won't distract you with the 00® Red Iridium® Polarized lens; engineered to protect your eyes from the blinding glare of paths and pavement.

G30™ IRIDIUM®

Essential equipment for world-class golfers, G30™ Iridium® optimizes visual detail and depth perception to help you spot subtle variations in grass textures and slope contours.

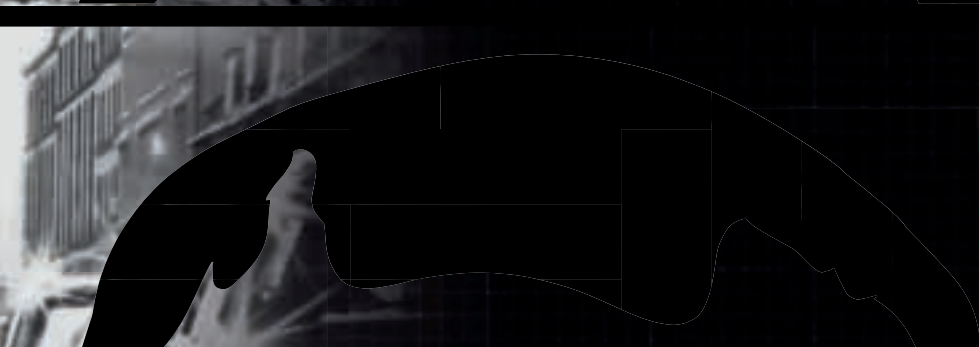

VR28® BLACK IRIDIUM®

In medium to low light, our specially engineered VR28® Black Iridium® lens maximizes clarity and depth perception by increasing contrast between the subtle shades of brown, green and red in trail environments.

BRONZE POLARIZED

70% of the world's surface is covered by water, and 100% of it is ready to blind you with glare that can be up to ten times brighter than surrounding light. All of our water lenses block 99% of reflected glare to eliminate all that irritation, discomfort and distraction.

BLACK IRIDIUM® POLARIZED

Excellent all-purpose lens for bright light conditions. This lens covers a full range of sports and training — practically anything under the sun, especially when it is bright and blinding.
