Oakley founder Jim Jannard rejected the idea of packaging science in fashion. He wanted to show the world that form and function could be the same thing.

PHYSICS ELEVATED TO AN ART FORM

A brand built on the art of science became known for the science of art, and for refusing to compromise on the highest standards of quality. We have applied that same uncompromising excellence to timekeeping, inventing instruments of precision and sculpturing high performance materials with mechanical beauty.

Oakley is a technology and design driven company that seeks out problems, finds solutions and wraps those solutions in art. The drive to innovate has put technology on the fast track with more than 540 patents awarded for Oakley products that serve consumers in more than 100 countries.

REDEFINING THE LIMITS OF POSSIBILITY

We continue to redefine the limits of possibility with the power of CAD/CAM engineering, the precision of five axis Computer Numeric Control machining, and the passion to invent.

The authenticity that made Oakley a global icon now inspires the heritage of Swiss watchmaking toward new possibilities. Genuine innovation brings New World technology to Old World craftsmanship in creativity that delivers the unexpected, and in art that turns instruments of performance into objects of desire.

INNOVATION BRINGS NEW WORLD TECHNOLOGY TO OLD WORLD CRAFTSMANSHIP IN CREATIVITY THAT DELIVERS THE UNEXPECTED

INSTRUMENTS OF PERFORMANCE, OBJECTS OF DESIRE

We create each timepiece by looking beyond the conventional ideas of industry standards, inspired by those who challenge all limits and measure life in fractions of a second.

YOU LET STYLE WALK

OAKLEY MINUTE MACHINE WAS SOMETHING THAT LEAVES ITS MARK. WE WANTED AN AUTHENTIC DESIGN, ASSERTIVE ENOUGH TO THROW SOME WEIGHT AROUND

If you let style walk a beaten path, your tracks will never get noticed. The inspiration for Oakley Minute Machine™ was something that leaves its mark. We wanted an authentic design, assertive enough to throw some weight around — even if gravity barely takes notice because the case is made of lightweight titanium.

OAKLEY MINUTE MACHINE™

Optimized with the precision of 13-jewel movement, this Swiss Made chronograph measures cumulative time, intermediate time and split time down to a tenth of a second. It features a pure sapphire crystal, a four-year battery and 10-bar water resistance, equivalent to the pressure at a depth of 100 meters (330 feet). Choose among four elite styles, including our Diamond Dial Edition.

Seventy-five genuine full cut diamonds create an exceptional rarity in the artistry of precision timekeeping. This masterpiece of style is rendered with a center pavé and a gem at each hour position, bringing a

OAKLEY MINUTE MACHINE™ DIAMOND DIAL EDITION

new level of sophistication to the time honored heritage of Swiss watchmaking. The Diamond Dial edition of Oakley Minute Machine™ comes with an owner's Certificate of Authenticity.

TITANIUM CASE
BLACK DIAMOND DIAL
PART # 10-222
PRICE: \$3500

MOVEMENT

- Swiss Made, gold plated, 13-jewel quartz movement
- Chronograph – six-hand analog display
- Large date display
- 1/10 sec. up to 30 minutes & 10 hour counter
- 30 minute counter center stop second (1/1 sec)
- Cumulative and SPLIT functions
- Minute and hour hand with luminous material
- Power saving mechanism
- 48 month battery

CASE

- Impact forged titanium
- Titanium case back
- High-precision Computer Numeric Control (CNC) machining
- Sapphire crystal with anti-reflective coating
- Screw down crown for high-pressure endurance
- 10 bar water resistance (100 meters / 330 feet)
- Finish options: Brushed Titanium

ATTACHMENT

- Titanium Bracelet, Leather Strap, Rubber Strap

Engineered for a life with momentum, this true Swiss Made chronograph lets you gauge the moments that refuse to stand still. Measure added time and split time down to a tenth of a second with the ease of dedicated sub dials. The top bezel can be rotated for an additional measure of time, and a number scale around the perimeter of the dial lets you compute speed, based on travel time.

CRANKCASE™

This chronograph comes with the precision of 13-jewel Swiss Movement and the durability of water resistance equivalent to the pressure at 100 meters (330 feet) beneath the surface. The impact forged stainless steel case is shielded with carbon reinforced impact bumpers and matched with a pure sapphire crystal, enhanced with anti-reflective coating. Band options include an Unobtainium® strap or stainless steel links crafted with self-lubricating thrust washers.

TOP BEZEL **CRANKCASE™** FOR AN ADDITIONAL MEASURE OF TIME, AND A NUMBER SCALE ARCHIMETER OF THE DIAL LETS YOU COMPUTE SPEED, BURNEL TIME. THIS CHRONOGRAPH COMES WITH SELECTION OF 13-JEWEL SWISS MOVEMENT

MOVEMENT

- Swiss made quartz movement, 13-jewel
- Six-hand analog display – Chronograph, Small Second, Center stop second hand, 1/10 seconds up to 30 minutes, 10 hour counter, 30 minute counter
- Chronograph Functions: ADD, SPLIT
- Date by mechanical display
- 48-month battery

CASE

- Impact forged 316L stainless steel
- Carbon Reinforced Impact Bumpers
- Screw-down stainless steel case back
- High-precision Computer Numeric Control (CNC) machining
- Sapphire crystal with anti-reflective coating
- Screw-in crown for high pressure endurance
- 10 bar water resistance (100 meters / 330 feet)
- Finishing options: Brushed w/Polished Stainless Steel

ATTACHMENT

STAINLESS STEEL BRACELET

The precision of a true Swiss Made timepiece with five-jewel movement was just our starting point. We gave it rugged durability and honed it with sophistication, using steel that puts style on the cutting edge. Crankcase™ comes with the endurance of a 72-month battery and the depth-defying pressure resistance of 10 bar, equivalent to 100 meters (330 feet) beneath the surface. The hardest crystal utilized in watchmaking, pure sapphire is enhanced with anti-reflective coating and mounted over the three-hand display.

CRANKCASE™ THREE-HAND EDITION

Stainless steel is impact forged to create the durable case, and we shielded the sides with carbon reinforced impact bumpers. Choose the Unobtainium® strap edition or a premium design with individually crafted links of sculptural stainless steel, optimized with self-lubricating thrust washers.

Sometimes style is in a class of its own. This Swiss Made timepiece takes it there with impact forged stainless steel and the art of an Oakley original. Five-jewel Swiss Movement is the level of uncompromising precision, but this unique design is more about standing up to a life that never stands still.

CRANKCASE™ **THREE-HAND SMALL EDITION**

The pure sapphire crystal is the hardest you will find in watchmaking, and we enhanced it with anti-reflective coating. It is part of a durable architecture that includes carbon reinforced impact bumpers, plus pressure resistance equivalent to a water depth of 100 meters (330 feet). Choose the comfortable strap of genuine leather or the metal bracelet, specially engineered with self-lubricating thrust washers.

Our original Judge® timepiece raised the bar of performance and style, and this latest edition blends the precision of the finest Swiss Movement with the refinement of a new dial face. Choose the genuine leather strap edition or the premium metal bracelet that reduces weight with ingenious technology. Each link in the ergonomic band combines surgical grade stainless steel with a filled backing of Unobtainium® for the comfort of reduced weight.

JUDGE® II

A true Swiss Made chronograph with 10-jewel movement, Judge® II includes a sub dial for logging minutes and hours, plus a sweeping second hand that accelerates to the current moment when pause is released. The pure sapphire crystal is enhanced with anti-reflective coating, and an inlaid window improves visibility of the sub dial with subtle magnification. In the art of timekeeping, Judge® II offers refined sophistication to a life measured in moments.

MOVEMENT

- Swiss made, gold plated, ten-jewel quartz movement
- Five-hand analog display

Engineered for world travelers and those who live life on a global scale, the dedicated sub dial of this Swiss Made timepiece displays a separate time zone. The surgical grade stainless steel case is matched with a crystal of pure sapphire, and an inlaid window provides subtle magnification of the sub dial. Viewing is further optimized by a large easy-to-read date display and anti-reflective coating on the crystal. Precision is at the level of five-jewel Swiss Movement, and durability features include water resistance that withstands pressure equivalent to a depth of 100 meters (330 feet).

JUDGE® II DUAL TIME

Designed for all-day comfort, this timepiece is available with a genuine leather strap or a band of surgical grade stainless steel with the flexibility of micro adjustment links. To minimize weight, each link in the ergonomic bracelet is crafted with a filled backing of Unobtainium®, a lightweight synthetic that maintains a supple grip on the wrist.

When we created our premier Jury® timepiece, an instrument of timekeeping became a statement of style. Inspired by athletes who live life by their own rules, this latest edition takes the precision of a true Swiss Made design to a new level of art. The finest 10-jewel Swiss Movement is cradled in surgical grade stainless steel. Enhanced with anti-reflective coating, the pure sapphire crystal is rendered with an inlaid window that subtly magnifies a second-counting sub dial.

JURY® II

Jury® II is available with a genuine leather strap or a bracelet of surgical grade stainless steel, optimized with the flexibility of micro adjustment links. Each link in the ergonomic architecture is crafted with a filled backing of Unobtainium®, a lightweight synthetic that maintains a supple grip on the wrist. The end result offers a level of comfort that can stand up to the challenge of life on the go.

THEY FOLLOW THE

INSPIRED A DESIGN THAT LIVES AND BREATHES THE

HOLESHOT™

A SWISS MADE CHRONOGRAPH WITH THE SOPHISTICATION OF A

They follow their own path and obey no limits, not even their own. The authenticity of Oakley athletes inspired a design that lives and breathes their active lifestyle, a Swiss Made chronograph with the sophistication of a technically inspired dial face. Engineered with four-jewel Swiss Movement, this precision instrument measures cumulative time, intermediate time and split time down to a tenth of a second, and a number scale around the perimeter of the dial lets you compute speed based on travel time.

A durable stainless steel case is matched with a pure sapphire crystal that takes full advantage of anti-reflective coating. Pressure endurance reaches the level of 10 bar, equivalent to a depth of 100 meters (330 feet) beneath the surface. Choose a band of Advanced Unobtanium® or a special rendition that flanks Unobtanium® with sculptural stainless steel.

TECHNICAL SPECIFICATIONS: HOLESHOT™ FACE. ENGINEERED WITH FOUR-JEWEL SWISS MOVEMENT, THIS PRECISION INSTRUMENT MEASURES CUMULATIVE TIME, INTERMEDIATE SPLIT TIME DOWN TO A TENTH OF A SECOND, AND A PERIPHERAL NUMBER SCALE AROUND THE PERIMETER.

Our world-class athletes wanted a design that could bring sport into life, something that could take on an active lifestyle while offering a look of refinement. We created this true Swiss Made timepiece, a blend of stainless steel and pure sapphire, the hardest crystal used in watchmaking.

HOLESHOT™ THREE-HAND EDITION

Anti-reflective coating on the crystal offers a clear view of the three-hand analog display, and durability reaches the level of 10 bar water resistance — equivalent to the pressure at a depth of 100 meters (330 feet). For comfort that outlasts even your longest day, the sculptural band is made of flexible Oakley Unobtainium®.

STEEL AND **HOLESHOT™ 3-HAND EDITION** CEMENTAL ED IN WATCHMAKING, ANTI-REFLECTIVE COATING ON THE CRYSTAL OFFERS A CLEAR VIEW OF THE THREE-HAND ANALOG DISPLAY, AND DURABILITY REACHES THE LEVEL OF 10 BAR WATER RESISTANCE — EQU

Inspired by those who refuse to be defined, we created a true original that beats with the heart of Swiss Made quartz movement. This edition of Holeshot™ blends impact forged stainless steel with a pure sapphire crystal and a comfortable band of Unobtainium®, achieving a level of style that brings sport into life without leaving sophistication behind.

HOLESHOT™ THREE-HAND SMALL EDITION

Water resistance is equivalent to the pressure at 100 meters (330 feet) beneath the surface, and anti-reflective coating on the crystal ensures a razor-sharp view of the three-hand analog display.

 THERMAL OPERATING MIN 0°C (32°F)
 THERMAL OPERATING MAX. 50°C (122°F)
 WATER RESISTANCE. 10 bar; equivalent to depth of 100m / 330ft
 BATTERY. Silver oxide: No. 397, SR 726 SWY
 BATTERY ENDURANCE. Approx. 46 months

HONED / BLACK DIAL
 RUBBER STRAP
 PART # 10-213
 PRICE: \$395

HONED / WHITE DIAL
 RUBBER STRAP
 PART # 10-212
 PRICE: \$395

HONED / BLUE DIAL
 RUBBER STRAP
 PART # 10-214
 PRICE: \$395

POLISHED / BLACK DIAL
 BLACK LEATHER
 PART # 10-250
 PRICE: \$395

POLISHED / WHITE DIAL
 WHITE LEATHER
 PART # 10-249
 PRICE: \$395

It takes 16 million pounds of force to hammer high-grade stainless steel into submission. The result is Blade™ II, a sculpture of razor contours blended with pure Unobtainium®. A genuine Swiss Made timepiece, it is available with a stainless steel band or an Unobtainium® strap, and both editions are engineered to fit a full range of wrist sizes with comfortable flexibility.

BLADE™ II

A 74-month battery gives this timepiece uncompromising endurance, and its precision comes from five-jewel Swiss Movement. There is no harder crystal than sapphire when it comes to watchmaking, so that's what you'll find over the intuitive analog display, and we gave it a special coating to eliminate reflection. A dual-seal crown helps protect the case against water pressure equivalent to 330 feet (100 meters) beneath the surface.

STAINLESS STEEL BRACELET OR AN UNOBTAINIUM STRAP, AND BOTH EDITIONS ARE ENGINEERED TO FIT A WIDE RANGE OF WRIST SIZES WITH COMFORTABLE FLEXIBILITY. A 74-MONTH BATTERY GIVES THIS TIMEPIECE UNCOMPARABLE ENDURANCE, AND ITS PRECISION

MOVEMENT

- Gold plated, five-jewel Swiss made quartz movement
- EOL (End Of Life) system – second hand moves at four-second intervals when battery is low
- Three-hand analog display (hours, minutes and seconds)
- Date by mechanical display
- Six-year battery

CASE

- Impact forged Stainless Steel
- HSF Unobtainium® insert
- Screw-down Stainless Steel case back
- High-precision Computer Numeric Control (CNC) machining
- Sapphire crystal with anti-reflective coating
- Dual-sealed crown for high pressure endurance
- 10 bar water resistance (100 meters / 330 feet)
- Finishing options: Orbital Brushed, or
Orbital Brushed with Stealth Black Plating.

ATTACHMENT

STAINLESS STEEL BRACELET:

- Impact forged Stainless Steel
- Wide range of fit from small to large wrist sizes
- Micro adjustment links for maximized flexibility
- Stainless Steel deployment clasp

RUBBER STRAP:

- Oakley Advanced Unobtainium Rubber
- High strength 3-D internal structure
- Stainless Steel buckle

TECH SPECS

FREQUENCY OF CRYSTAL OSCILLATOR 32,768 cycles per sec.
 ACCURACY AT NORMAL TEMPERATURE. -10/+20 sec./mo.
 OPERATING TEMPERATURE RANGE. 0°C to +50°C (32°F TO 122°F)
 WATER RESISTANCE 10 bar (100m)
 BATTERY #371 43uAh
 BATTERY LIFE Approx. six years

ORBITAL BRUSHED
 SUNBURST BLUE DIAL
 PART # 10-195
 PRICE: \$500

ORBITAL BRUSHED
 SUNBURST WHITE
 PART # 10-196
 PRICE: \$500

ORBITAL BRUSHED
 CARBON FIBER
 PART # 10-197
 PRICE: \$500

ORBITAL BRUSHED / SUNBURST BLUE
 BLACK RUBBER
 PART # 10-188
 PRICE: \$450
